Keep Noblesville Beautiful receives 2013 Sustain Noblesville recycle bins

To encourage recycling at community events and reduce Noblesville's environmental footprint, Sustain Noblesville offered a recycle bin giveaway *Request for Proposals* process last fall for Noblesville's non-profit organizations. Planners of non-profit, church, and school programs were invited to apply for 2-8 portable recycling bins to facilitate recycling at their future events.

The 2013 recipient of eight bins is Keep Noblesville Beautiful (KNB). KNB is a community improvement organization

which provides educational and community action programs to the general public in the Noblesville area. These programs help government, business, and citizens work together to provide litter prevention and clean-up, neighborhood beautification, and other services which help make the community healthier, safer, and provide a viable and sustainable impact on the lives of residents.
